So, removing the idiomatic response that we will all have to those knobs, the box is really solid and would be a welcome addition to anyone's studio arsenal, especially if it is meant to be a streamlined do a bunch of things with very little outboard type setup.

I am always interested in new EQs, so I asked the folks at API to send me a pair of the V14s.. We were doing a song with Troy Sanders from Mastodon on guest vocals Using this box to record things like guitars and room mic and snare, the operational aspects of the 1073 SPX were cool it works like you want it to.. I will always welcome a well-designed, solid piece of gear into the world with open arms.. Its pretty much a 2U channel strip with preamp, compressor, gate, and EQ sections.. In this Sound On Sound interview, on the 'Jumble Sale Studio' section, a bunch of Jenkinson's gear is mentioned.. I found quite a few choices that would serve my purposes, mostly in the 2000 to 4000.. High-pass, low frequency select, and cut and boost the usual suspects But also on the face of this new box were functions I didn't recognize and wasn't immediately comfortable with.
